

HARSH SHAH

📍 Mumbai, Maharashtra, India ✉ hrsshah04022004@gmail.com ☎ +919175366700 🌐 in/harshshah2004

SUMMARY

Software Developer with hands-on experience building AI-powered, multi-Agent systems in the financial domain. Worked on designing LLM-driven workflows, optimizing response latency (~50% reduction), and implementing real-time streaming experiences. Strong in Python, backend development, and practical AI integration, with a focus on building reliable, scalable systems. Known for clear communication, ownership, and effective collaboration within teams.

EXPERIENCE

Agentic AI Software Developer

TIAA

July 2025 - Present, Mumbai

- Built a multi-agent AI system for retirement workflows (e.g., RMD, SDA) using a centralized orchestration agent (LangChain `create_agent`) to route queries to domain-specific specialist agents.
- Replaced LangGraph-based orchestration with custom Python sequencers for deterministic execution, reducing LLM calls from ~5 to 2–3 per request and improving response latency from ~17–18s to ~8–9s (~50% reduction).
- Designed persistent memory and implemented agent-to-agent communication via MCP server for modular scalability.
- Developed a dynamic “Magic Window” UI powered by a UI experience agent that converts backend responses into real-time frontend templates.
- Enhanced UX with SSE streaming (reduced perceived latency); implemented SSO, speech-to-text, and embedding-based query suggestions; contributed to Docker, Jenkins CI/CD, and OpenShift deployment workflows.

Full Stack Developer

Space Agency

June 2024 - May 2025, Mumbai

- Created a highly secure login system using JWT, cookies, encryption, and decryption techniques to safeguard user data and authentication processes.
- Built robust backend functionalities with Node.js, ensuring data integrity and secure communication between the server and client.
- Designed and implemented a custom flipbook feature using jQuery, eliminating the need for costly third-party solutions and saving the client significant expenses.
- Collaborated closely with clients to tailor web applications to their specific needs, ensuring exceptional functionality and user experience.

FrontEnd Web Developer (Intern)

Katapult Technologies Pvt. Ltd

July 2021 - Sep 2021, Mumbai

- Designed and developed the frontend of a Broadband Service website, ensuring a user-friendly and visually appealing interface.

PROJECT

ResumeCraft – Resume Builder Platform

GitHub

- Developed an intuitive resume-building platform that allows users to create professional resumes by simply filling out forms, eliminating the need for technical knowledge like LaTeX.
- Built using the MERN stack, incorporating advanced technologies like Redux, Redux Toolkit, Redux Saga, Node.js, JWT, encryption, cookies, and sessions to ensure a secure and seamless user experience.

CIS Audit Automation – Automated Compliance for CIS Benchmarks

GitHub

- Developed a web-based application to automate the compliance process for CIS benchmarks, reducing manual effort through system scanning and compliance detection.
- Designed an intuitive frontend using HTML, CSS, and JavaScript, providing users with actionable suggestions to enhance system security and compliance.

EDUCATION

B.Tech in Computer Science and Engineering (IOT and Cyber Security with Block Chain Technology)

Minor in Artificial Intelligence | Machine Learning | Deep Learning • Dwarkadas Jivanlal Sanghvi College of Engineering • Mumbai, Maharashtra • 2022 - 2025 • 8.89/10
• CGPA: 8.70/10.

Diploma in Computer Engineering

Shri Bhagubhai Mafatlal Polytechnic • Mumbai, Maharashtra • 2019-2022 • 92%
• Percentage: 92%.

SKILLS

Python, LangChain, LangGraph, Multi-agent systems, FastAPI, LLM workflows, Prompt engineering, Custom agent workflows (sequencers), LLM optimization & latency improvement, Memory handling (short/long-term), REST APIs, SSE (streaming), Websocket, Docker, Jenkins, OpenShift

Discipline, Confident, Clear communication, ownership, structured thinking, team collaboration, reliability, adaptability

AWARDS & HONORS

Special Recognition

TIAA • 2025

- Received special recognition in an internal company Hackathon for creating an extension for vision-affected people peopan AI using AI Agent

Smart India Hackathon 2024 – National Finalist

India • Dec 2024

- Achieved finalist status in SIH 2024 by presenting an innovative solution to a real-world problem.
